## SUMMARY

Full-stack developer with a master's in Software Engineering, experienced in leading end-to-end product development. Specialized in Next.js, React, and Laravel, delivering solutions for SaaS, e-commerce, and multi-tenant platforms.

## WORK EXPERIENCE

### Asis.tn

Nov 2024 - Present

#### Full stack developer

Tunis

- Delivered six mobile-first responsive websites using Next.js, Shadcn UI, and Tailwind CSS, achieving high Lighthouse scores; integrated four sites with WordPress as a headless CMS.
- Refactored a legacy Laravel Blade application into a modern Laravel/React stack, delivering a UI/UX redesign and facilitating a shift to multi-tenancy that reduced technical debt and prepared the platform for rapid scaling.
- Minimized database overhead by identifying and fixing N+1 query patterns and introducing strategic caching, resulting in a more stable application environment and improved daily operational efficiency.
- Provided continuous production support for ~9 months, resolving critical bugs, shipping UI/UX enhancements and integrating new features, while authoring user guide that helped onboard users and lowered support inquiries.
- Built a full-stack e-commerce platform with a custom storefront and admin panel using Next.js, Tailwind CSS, Shadcn UI, Supabase, Prisma, Redux for cart management, and Cloudinary for media handling.

### Sofrecom Tunisie

Feb 2024 - Jun 2024

#### Full stack developer

- Collaborated in an Agile team to develop a single-page application for managing complaints using Spring Boot, JWT-based RBAC, and Angular, which enabled faster complaint handling.
- Automated deployments via GitLab CI/CD pipeline, Ansible and Docker Swarm; wrote unit & integrations tests delivering 97%+ test coverage, integrated SonarQube to automate code quality audits and improve release reliability.
- Fine-tuned & integrated LLM for complaints categorization and response generation for improved customer support.

### Tunisie Telecom

Jun 2022 - Jun 2022

#### DevOps intern

- Deployed backend service using Docker and Kubernetes on Google Cloud Platform.
- Configured Prometheus and Grafana to monitor cloud infrastructure and applications, providing real-time alerts that speed up issue detection and resolution

## EDUCATION

### Sesame university, Tunisia

Sep 2019 - Aug 2024

#### Master's Degree, Software engineer

- GPA: 4.30

### Ibnu rachik ezzahra high school

#### Mathematics Degree

## CERTIFICATIONS

- **Scrimba - Advanced React:**Sep 2024
- **Professional Google Cloud Architect:**Dec 2022
- **IT Specialist - Databases:**Jun 2022

## SKILLS

- **Backend:** Laravel, Springboot, Eloquent, MySQL, Prisma, Supabase, PostgreSQL, PHP
