## SUMMARY

Full-stack developer with a master's in Software Engineering, experienced in leading endtoend product development. Specialized in Next.js, React, and Laravel, delivering solutions for SaaS, e-commerce, and multi-tenant platforms.

## WORK EXPERIENCE

### Asis.tn

*Full stack developer*

Nov 2024 - Present

Tunis

- Delivered 6+ marketing websites with Next.js, Shadcn UI & Tailwind CSS, including 4 headless CMS implementations with wordpress, 3 multilingual platforms, mobile-first responsive design, SEO optimization, and UI design in Figma, achieving Lighthouse scores above 90 on several sites.
- Built a fullstack ecommerce platform by migrating a legacy PrestaShop site and developing a custom storefront and admin panel with Next.js, Tailwind CSS, Shadcn UI, Supabase, Prisma, Redux for cart management, and Cloudinary for media handling.
- Refactored a legacy Laravel Blade application to Laravel with Inertia.js (React), delivering a UI/UX redesign and migrating to a multitenant architecture, and implemented strict SoC and MVC principles with modular, reusable code, which enabled faster onboarding of new tenants and supported business growth
- Improved application performance by optimizing SQL queries, eliminating N+1 issues, and introducing Laravel caching, Reduced the number of SQL queries from over 1,000 to less than 10, resulting in noticeably faster load times
- Integrated thirdparty APIs after technical meetings and official validation, and built dashboards with analytics visualizations, workflows, Kanban views, calendars, and notifications, giving stakeholders realtime insight and reducing reporting time
- Provided continuous production support for ~9 months, resolving bugs, delivering functional and UI/UX improvements, and integrating new features; produced comprehensive documentation—including a 90plusslide training presentation and a full user guide—that helped onboard users and lowered support inquiries

### Sofrecom Tunisie

Feb 2024 - Jun 2024

*Full stack developer*

- Developed a Spring Boot/JPA RESTful API with JWT-based RBAC, delivering 97%+ test coverage and full technical documentation.
- Developed a responsive Angular single-page application and integrated Chart.js for data-driven dashboards, delivering faster data insights and enabling easier maintenance through clean, reusable code
- Automated deployments via GitLab CI/CD pipeline and Docker Swarm; integrated SonarQube to automate code quality audits and improve release reliability.

## EDUCATION

### Sesame university, Tunisia

Sep 2019 - Aug 2024

*Master's Degree, Software engineer*

- GPA: 4.30

### Ibnu rachik ezzahra high school

*Mathematics Degree*

## CERTIFICATIONS

- Scrimba - Advanced React:Sep 2024
- Professional Google Cloud Architect:Dec 2022
